The World Of Kartasia Offical Plugin

Hello and thanks for offering your help and developing this plugin! I would like the plugin ready by the end of November. If this timeframe can not work out, please talk with me, but I would like it done by then so we got time to work out any bugs. The plugin at the moment will allow the creation of classes and nations within the server. This is what the plugin should do.

- The ability to click a sign or chat a command that has you join a nation
- The ability to not be able to leave that nation
- The ability to click a sign or chat a commend that has you join a class that belongs to a nation
- The ability to level up within your rank buy paying in game money
- The ability to only PvP with people of other nations
- The ability to spawn with a kit depending on which class and nation you are in
- Everything should be able to be set up within a command document located in the plugin folder. You should be able to set up nations and classes like this...

Dwarves
    Miner
        Junior Miner
            Price: $100
            Items: 12, 13, 14, 15
        Senior Miner

   Items: 12, 13, 14, 15
  Master Warrior

This is a example, and does not have to be exactly like this. The line Dwarfs is the name of the nation one can join. The lines Miner and Warrior is the classes within that nation that you can join. Once

you are a Miner for example, you will start out as a Junior Miner, and you will get the items as listed. Once you pay for the specified amount, you will rank up to Senior Miner.

No matter how you make this possible, its okay. I just want the plugin to do these things and thats all it needs to do at the moment.
